5. Image Settings

1. Installation

[Top](#)

STEP1:

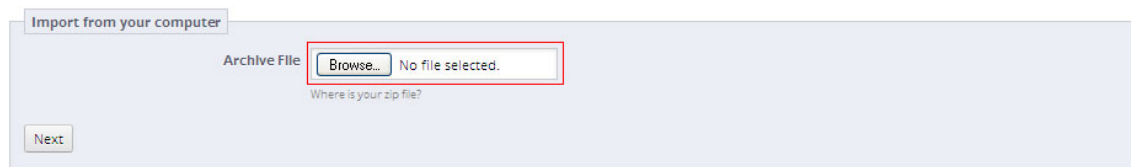

Go to **Modules > Modules** click on **Add a new module** at Top right corner.
Upload **themeinstallator** module.

Now find **import /export** a theme module and configure to install theme(PRSADD040).

STEP2:

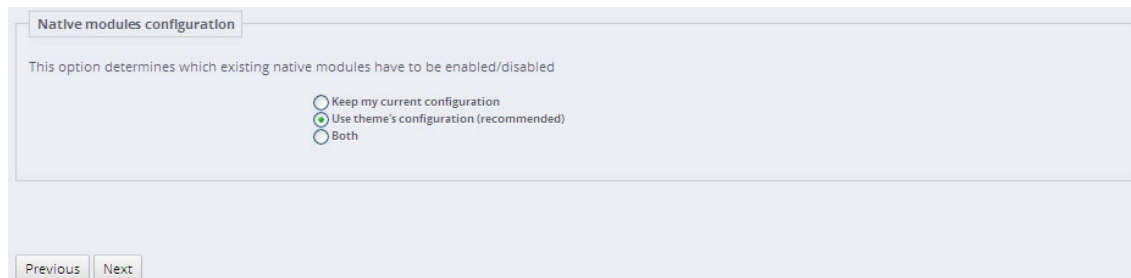

Here you will see “**Import from your computer**” where you need to select Installer ZIP file which you have downloaded (**PRSADD040_Installer**) and click on “**Next**” button.

STEP3:

Click on “**Next**” button

STEP4:

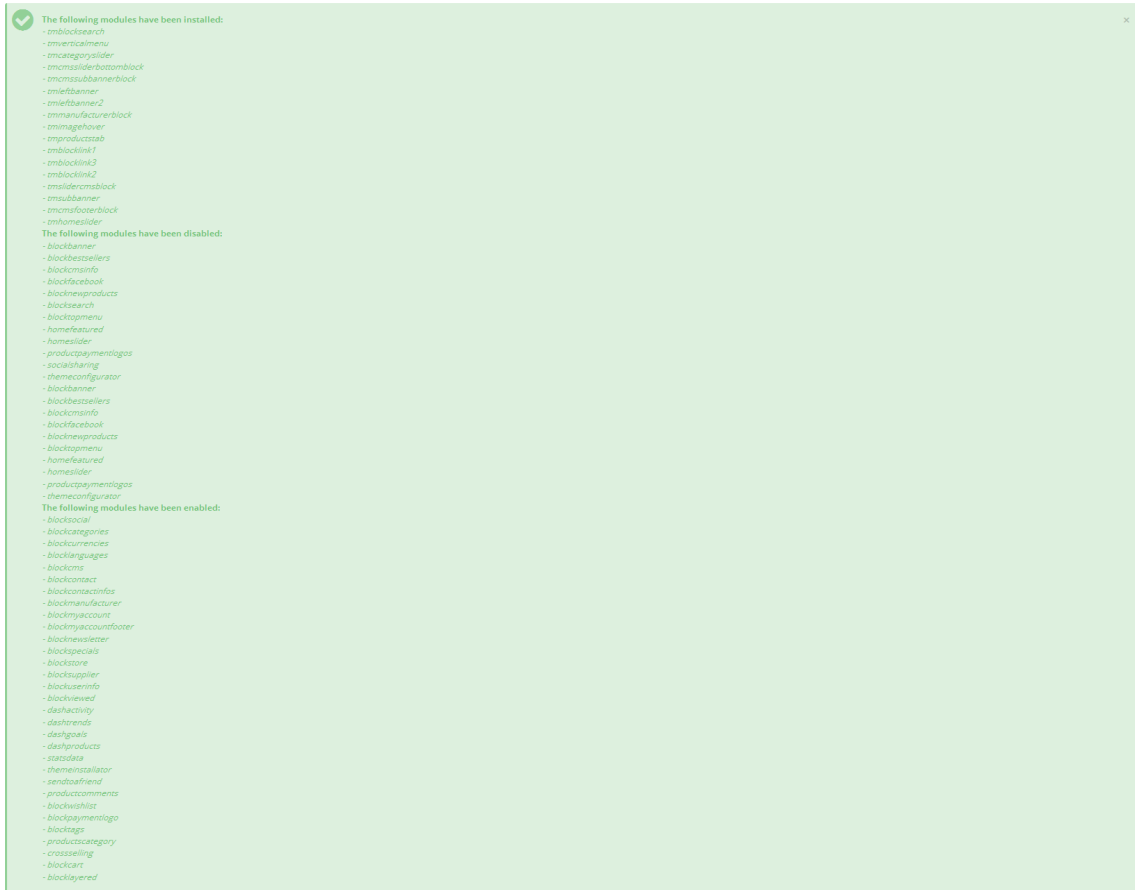

Here you will see “**Select the theme's modules you wish to install**”. Select all the checkboxes so that all the modules are installed which are included with the theme.

Now, under “**Native modules configuration**”, if you want to see the template same as demo store then you need to select “**Use Theme's configuration**” and if you want to keep your current configuration then select “**Keep my Current configuration**”.

Then click on “**Next**” button.

STEP5:

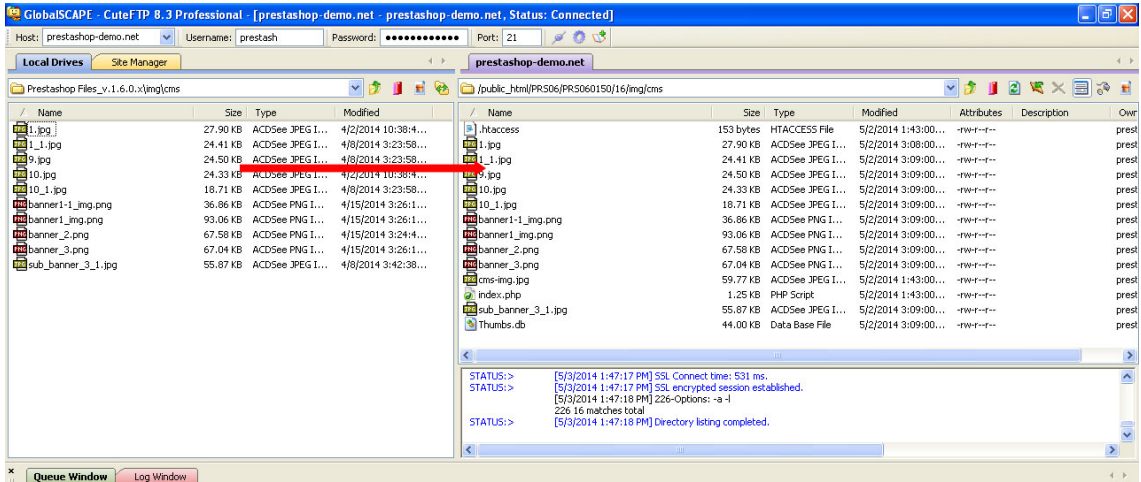

Here you just need to click on “**Finish**” button and that’s it! You have successfully installed your new theme!

NOTE:

After completion of above process upload all static images on your server in “/public_html/img/cms/” directory using FTP or Cpanel Like Below Image.

You can find images in package folder: Prestashop Files_v.1.6.1.x/img/cms/ directory.

2. Activate Left Column

Now, Activate left column for our template from admin panel.

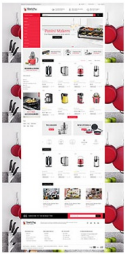

Go to **Preferences > Themes** and **Enable** “Default left Column” then click on **Edit** button for theme **PRSSADD040**

THEME

Name of the theme
